Manage ODBC Data Sources.			

Manage ODBC Data Sources.

Select User DSN tab and the click "ADD".

Create New Data Source		×
	Select a driver for which you want to set up a dat Name Microsoft Paradox Driver (*.db) Microsoft Paradox-Treiber (*.db) Microsoft Text Driver (*.txt; *.csv) Microsoft Text-Treiber (*.txt; *.csv) SQL Anywhere 12 SQL Server UltraLite 12	ta source.
	< Back Finish	Cancel

Choose SQL Server and click Finish to go to next screen.

Create a New Data So	urce to SQL Server	×
	This wizard will help you create an ODBC data source that you can use to connect to SQL Server.	,
	What name do you want to use to refer to the data source? Name: TSLnet]
	How do you want to describe the data source? Description: TSL Valuation Driver	
	Which SQL Server do you want to connect to? Server: 209.17.116.13	-
	Finish Next > Cancel Help	_

Complete the open fields with the data listed above and then click Next.

Create a New Data Source to SQL Server						
	How should SQL Server verify the authenticity of the login ID? O With Windows NT authentication using the network login ID. With SQL Server authentication using a login ID and password entered by the user.			in ID? ork login ID. and password		
	To change the network library used to communicate with SQL Server, click Client Configuration.					
			Client Configura	ation		
	Connect to SQL Server to obtain default settings for the additional configuration options.					
	Login ID: 🛽	Or Susan				
Password:						
< Back Next > Cancel Help						

Select only option "With SQL Server authentication using a login ID and password" and click Next.

Create a New Data Sour	rce to SQL Server	\times
	Change the default database to: (Default)	
	 Use ANSI quoted identifiers. Use ANSI nulls, paddings and warnings. Use the failover SQL Server if the primary SQL Server is not available. 	
	< Back Next > Cancel Help	

Select above Options and then click Next.

Create a New Data Sour	ce to SQL Server	×
	 Change the language of SQL Server system messages to (Default) Use strong encryption for data Perform translation for character data Use regional settings when outputting currency, numbers times. Save long running queries to the log file: C:\Users\susan\AppData\Local\Temp\QUERY.LO Long query time (milliseconds): 	o: s, dates and Browse 30000
	C:\Users\susan\AppData\Local\Temp\STATS.LOC	Browse
	< Back Finish Cancel	Help

Select above Options and then click Finish.
